

SUBJECT INDEX

This subject index lists people and places mentioned in the works cited; references are to entry numbers. Included are all people mentioned in the entries, regardless of their nationality. An effort was made to provide the first and last name of each person whenever possible. Place names include American states, cities, rivers, canals, and other geographic landmarks. Because of their special relationships with the United States, Mexico, Canada, and the Philippines are included. Other foreign countries and cities are not listed. The names in the index reflect current spelling rules; the spellings in the actual entries may differ. In those instances where one name refers to two different entities, brackets were added to specify whether the entry is a state, a city, or a river, i.e. New York (State) and New York (City).
